

RANJITA AGENCIES
PRIVATE LIMITED

WWW.RANJITASCAPES.COM

Ranjitascapescapes is one of the largest manufacturer & exporter Of preserved palm trees, areca palms, raphis palms, phoenix Robellini and topiary & replica plants like bamboo, ficus etc.

Ranjitascapescapes is in the business for more than 22 years & has very large numbers of installations around the world at Prestigious locations at malls, airports, offices ,villas etc.

Preserved plants are made from natural materials Which are preserved by a proprietary technology at our Factories located at kolkata, india.

These plants are a solution for interior greenification where it Is not possible to maintain live trees and plants.

Preserved plants are meant for interior installations only. They are to be installed in air-conditioned environments where The temperature does not exceed 28 c and Relative humidity does not exceed 60%.

Preserved plants do not require any maintenance Like water, sunlight and place to grow.

They only require dry dusting.

They are tailor made to the requirement of the clients.

They are very easy to install and maintain.

DETAILS FOR INSTALLING PRESERVED TREES

For installations of small Preserved Palm Trees up to 3M/10ft, they can be installed in weighted containers, pots etc.

For installations of Large Preserved Palm Trees 3M/10ft+, we will be supplying mild steel base plates with tubes. These plates are required to be bolted to a suitable surface namely a concrete floor, before the trunk is fitted. Our trunks with the inner pipe are then easily made to slide over the tube of the steel base plates as shown in the diagram below. This will hold the Palm straight. By fitting in such a way the Palm Trees look as if they are straight coming out of the floor not requiring a planter/ container.

In case Large Palm Trees are to be installed in containers/bed without base plates then they have to be concreted at least 1M/3ft in the said containers/bed.

The base of the Palm Trees can be designed to suit specific requirements maintaining safety at all times. Base plates are also available for twin trunks and large clusters. Our team will work out very simple solutions for installations on receipt of site details.
